Informatica

Cloud Data Integration

Unlock Potential with Sempre's Quick Start for Informatica Cloud Integration

Informatica Cloud Data Integration provides organisations with worldclass integration capabilities through a no-code / low-code interface.

The Sempre Quick Start Package, provides the fundamentals your team needs to get the most from the solution. Covering everything from architecture, administration and monitoring, to development processes, code reuse and cost management.

Our consultants work with your team to define the architecture and processes that are the best fit for your business. Then collaboratively develop an initial set of pipelines to get your team working and become self-sufficient.

Creating the correct architecture, environment structures, and development processes, underpins the success of the implementation and ensures maximum value and longevity from the platform.

A quick-start package enabling customers to implement Informatica Cloud Data Integration in under four weeks.

Create an initial set of pipelines, integrating data across the organisation for source systems, warehouses and lakes. Build complex transformations across multiple data sources, quickly proving value from the solution and gaining rapid adoption.

Learn best practice methodology for building pipelines, development practices and project conventions. Reuse assets for increased efficiency across projects and teams. Understand the consumption model and how to develop for efficient usage.
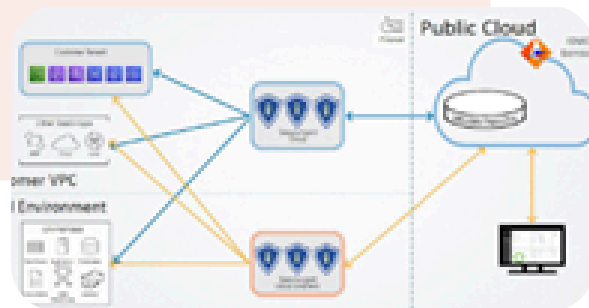

Sempre experts work alongside the customer team throughout the process, providing knowledge handover and ensuring ownership of the solution is with the customer.

**Three steps to Cloud Data Integration**

1. Design & Configure

Design, install, and configure, the correct infrastructure. Define the project structure and security model for your business. Create the development processes, standards and user access.

2. Build Mappings

Create an initial set of mappings using typical integration patterns for the organisation. Reuse components within Maplets, execute jobs through Task Flows, design processes for optimal consumption usage.

3. Manage & Operations

Monitor, audit and administer the environment. Understand and report on the consumption metrics. Understand further optional capabilities within the platform.
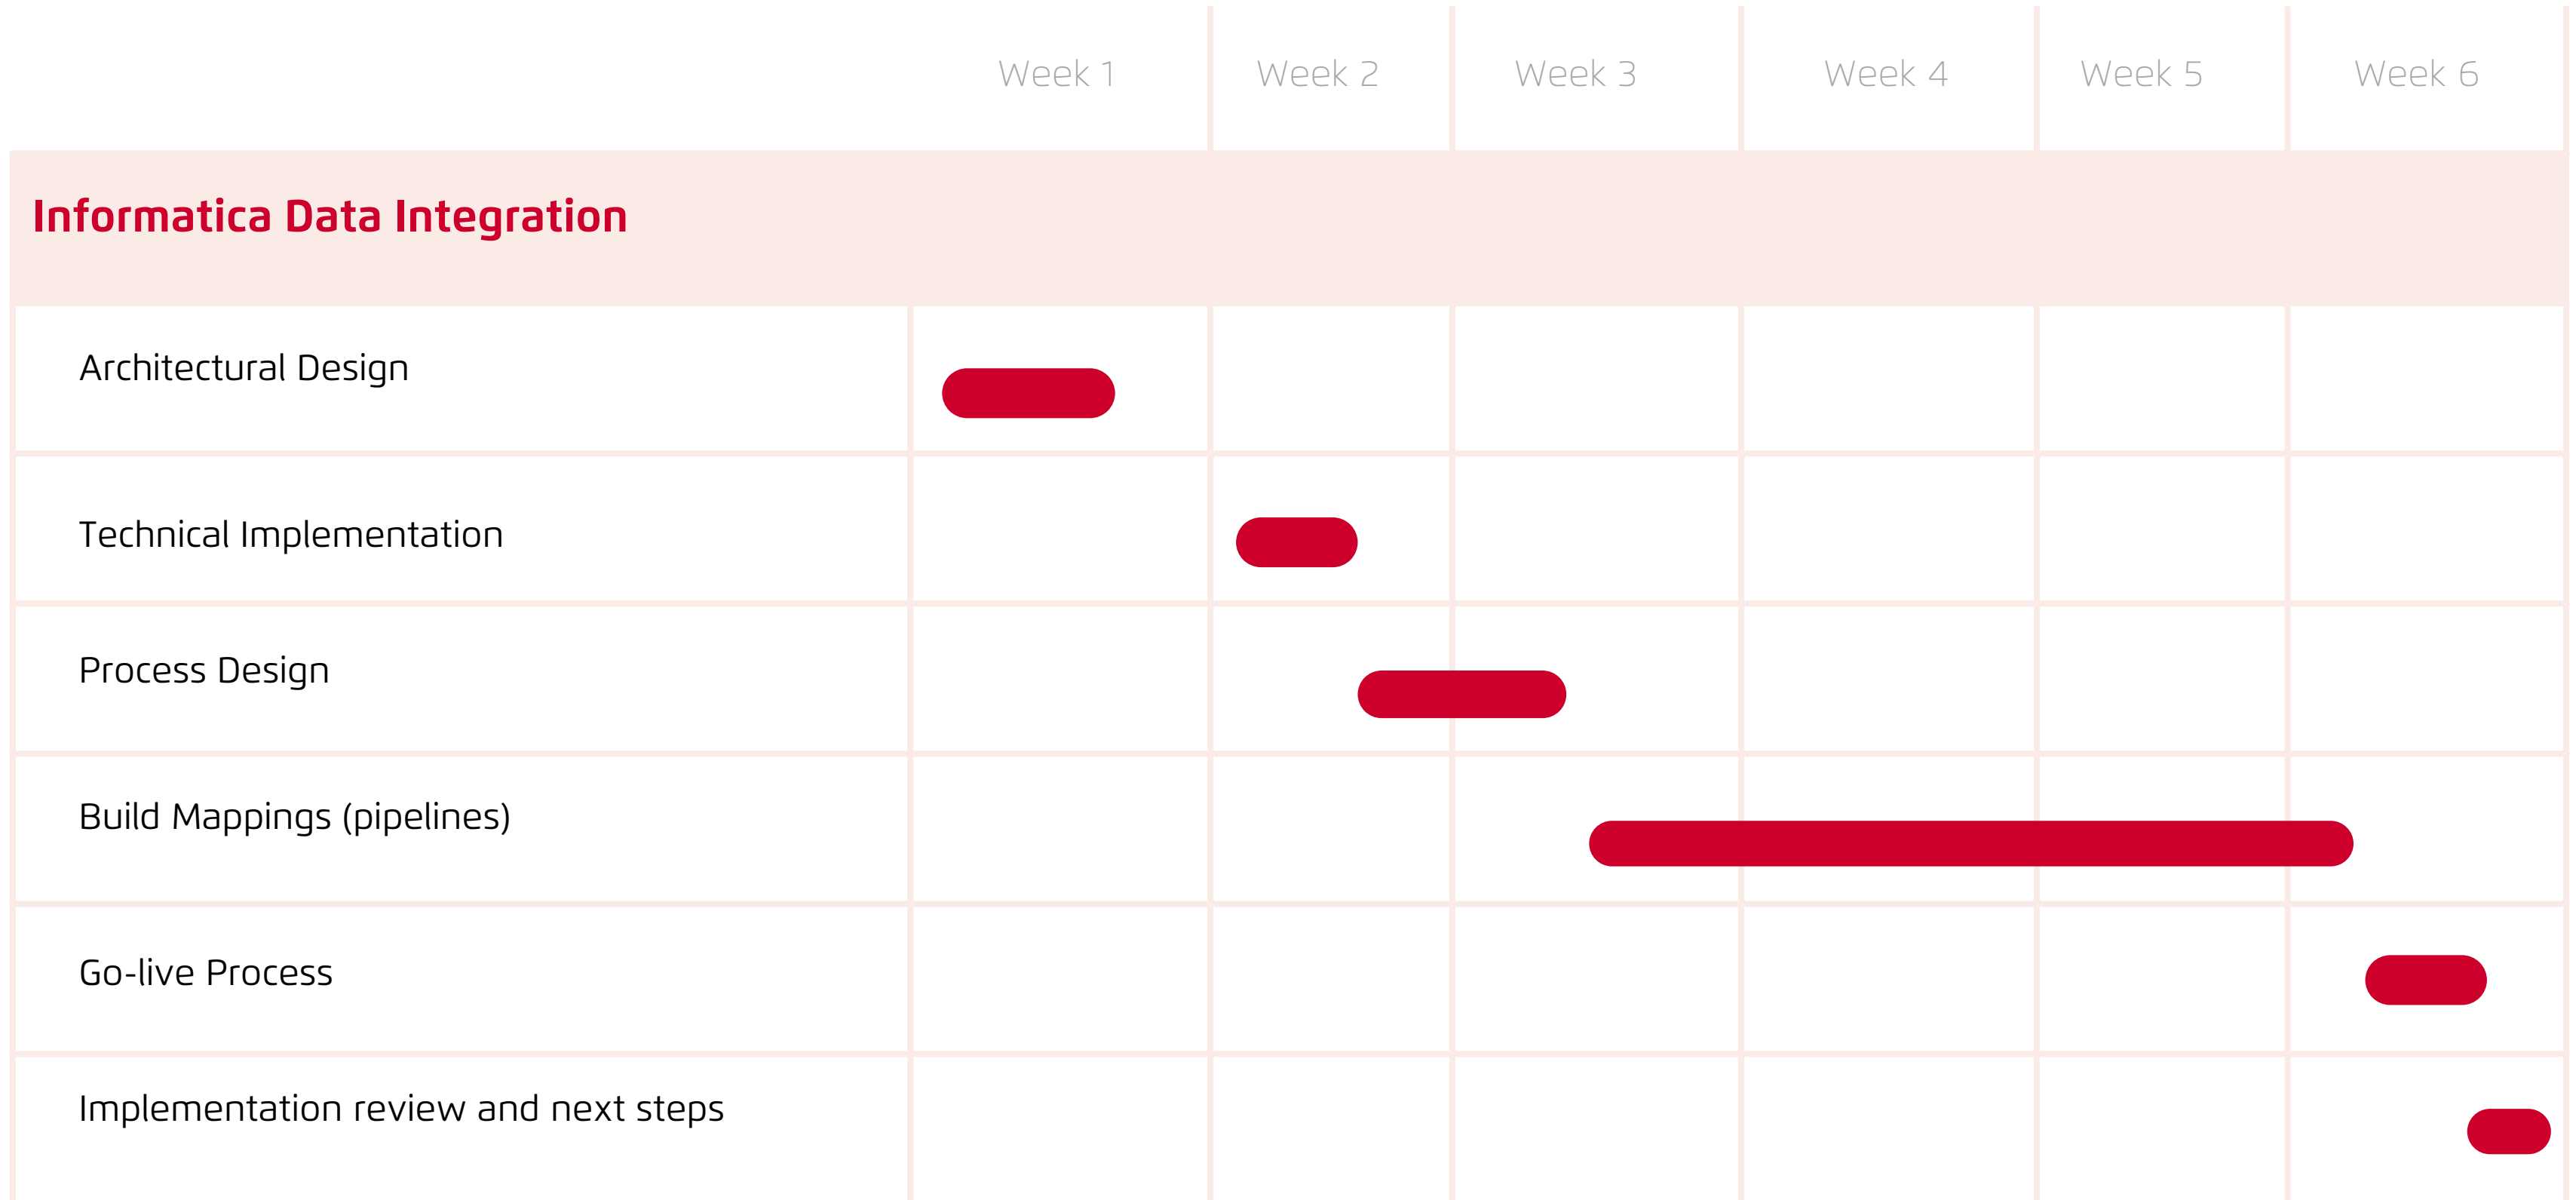

Process and Timeline

Indicative 6-Week Plan

	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6
Informatica Data Integration						
Architectural Design	▬					
Technical Implementation		▬				
Process Design		▬				
Build Mappings (pipelines)			▬▬▬▬			
Go-live Process					▬	
Implementation review and next steps						▬

Sempre Analytics is a leading provider of comprehensive data and analytics solutions, empowering organisations to make informed decisions and drive operational efficiencies. With expertise in Data Management, Business Planning, Business Intelligence, and Intelligent Automation, Sempre Analytics enables clients in industries such as Financial Services, Retail, Manufacturing, Housebuilding & Construction, Higher Education to unlock the full potential of their data. What sets Sempre Analytics apart is its unwavering commitment to customer success. Working with renowned technology providers, including Informatica, Anaplan, IBM, Microsoft and Automation Anywhere, to deliver innovative solutions, their dedicated team of consultants works closely with clients to develop tailored solutions that deliver real value.

Don't just manage data - master it. Contact our team today to embark on a journey of data-driven success!
